T50 AIR

Flexible & Durable
AirSkin™ mesh

01 Mesh Backrest and seat
Distributes weight evenly. Mesh will extend and curve to suit to users' weight. Therefore, its flexibility helps provide maximum support depending on weight and posture. Keeps cooler even in summer.

02 Synchronized Tilt
The seat plate and backrest tilt independently in response to natural body movements. The tilt mechanism allows the most suitable movement for your different postures.

03 Lumbar
The optional lumbar support gives more effective and sophisticated support to your lumbar. By the 4 way adjustments of height and depth, you may find its best spot for lumbar support

04 Fursys has designed U-Shaped frame
It does not touch users' body, and it distributes body pressures better as well.

05 Seat slide adjustment
Unlock the seat position by extending the paddle on the side of the under-seat brace. Then grasp the seat pan, sliding it forward or backward effortlessly to achieve the proper seat depth for each user. This feature assists the user in maintaining a correct comfortable seated posture, especially useful for taller people.

06 Height and depth adjustable arms
The armrest, made of top grade molded urethane, can be adjusted for height and distance to the seat front. The chair conforms to individual body types and postures, easing and promoting comfort in the neck, shoulders and arms.

07. Attachable seat cover
A few people would not prefer to use mesh chairs in Winter due to its breathability, and the tilt can be covered with dust in some cases. Moreover, mesh chairs selling in 828 (Business to Business) market have to satisfy different preferences of customers. So whoever does not prefer to use mesh Chair, our seat cover, along with T50 Air, can be provided for their comforts.

T50 AIR's AirSkin™ mesh is flexible and durable.

Soft microfiber is woven with strong nylon threads to provide longer lasting comfort. T50 AIR seat has been designed with an open frame so it does not touch the thighs, providing comfort in a range of seated positions.
